

Integrated Alarms for K-12 Education

24/7/365 protection for your school

Your school houses valuable assets that make tempting targets for intruders, including costly technology and confidential student and teacher data. Intruders also know that most school alarm systems are generally weaker than those at retailers, healthcare facilities, banks and other higher-profile locations.

Reduce the temptation with a best-in-class commercial system. Johnson Controls handles it all: customized needs assessment, turnkey installation, post-installation service and 24/7/365 monitoring. Our fully-redundant business security monitoring is provided through our UL-listed Customer Care Centers.

Best-in-class alarm systems designed for schools of all sizes:

- Infrared, photoelectric and motion sensors
- Industry-leading intrusion detection panels
- Easy, flexible integration with existing systems, including video, access control and others
- Wireless and remote/online options
- Monitored 24/7 with emergency dispatch
- Alarm verification to reduce or eliminate false alarms
- Inspections, maintenance, service and support
- Local, state and federal regulatory compliance

Johnson Controls has extensive K-12 security experience:

- Large public districts with multiple schools
- Parochial, charter and other private schools
- Urban, suburban and rural locations
- Expertise in securing funding

K-12 Education Security Experts
